

REMARKS

Applicants respectfully request entry of the present amendment pursuant to 37 CFR 1.312.

The present amendment seeks to correct the chemical formula set forth in claims 19 and 31. In particular, the formula for the non-aromatic epoxy resin was presented incorrectly in the amendment of June 6, 2007. The formula presented in the amendment of June 6, 2007 plainly was incorrect in view of page 4, lines 10-20 and other passages in the specification. Indeed, this correct formula was presented in the amendment of June 4, 2003 as suggested by the previous Examiner. As it is apparent that the incorrect formula was inadvertently reintroduced into the disclosure, applicants request entry of the present amendment at this time to correct this informality.

This, applicants believe that the amendment is needed so that the correct formula is presented.

The proposed amendment does not require an additional search or examination as the amendment merely corrects an informality found within the formulas of the claims. Indeed, this correct was suggested by the previous Examiner.

In that the proposed changes to the claims only correct an informality, applicants believe that the claims remain patentable.

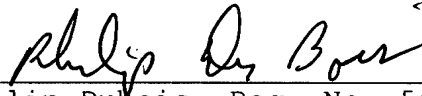

The proposed changes were not presented earlier as the error was only recently detected.

Thus, in view of the above, applicants respectfully request that the present amendment be entered and fully considered.

The Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 25-0120 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17.

Respectfully submitted,

YOUNG & THOMPSON
